## Installation Instructions

### Step 1:

Determine the desired position of the shelf. Shelf can be installed in a flat position or at a 10-degree downward angle. If a flat position is desired, the mounting brackets should be installed flat with the shelf as shown in figure 1. If a 10-degree downward angle is desired, flip the brackets over so the shelf brackets slope down as shown in figure 2.

### Step 2:

Locate the provided  $\frac{1}{4}$ -20 x .375 pan head screws. Place the shelf upside down on a flat surface. With a Phillips head screwdriver, thread the four pan head screws through the mounting brackets and into the wooden shelf.

### Step 3:

If the shelf is being installed in the sloped position or if an additional barrier is needed, locate the shelf retainer bracket and the four provided #8 x .50 pan head screws. Thread the screws through the bracket and into the wooden shelf.

**Step 4:**

Locate the left and right shelf clamps and the two ¼-20 x .375 hex head screws. Loosely install the screw through the shelf clamps into the shelf brackets.

**Note:**

The shelf clamp will sit flat on the shelf bracket with the threaded insert facing inward.

**Step 5:**

Take the assembled shelf and place the mounting brackets on to an accessory bar. Lift up on the shelf clamp and fully tighten hardware.
