

MOBILE ESD CART

A unique solution to ensure protection of your sensitive electrical components

HASSLE-FREE AND SECURE

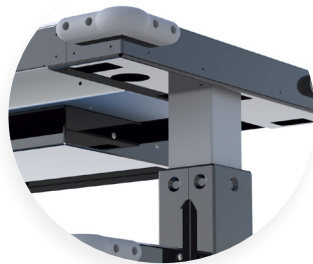

Designed for mobile ergonomics and safety in mind. This cart features electrically controlled height adjustability between 29" and 54". Lithium-Ion battery and intelligent controllers allow for pre-programmable height settings to quickly satisfy repeat users and applications. The lift column actuators feature anti-collision detection to protect operators and their instruments when actuating downward movement of the work surface.

ESD WORKBENCH
